India's Cairn begins test production from Hazarigaon field in Assam

Cairn is planning to drill five to ten high impact exploration wells across the Golaghat, Jorhat and Tinsukia districts of Assam.

Cairn currently owns 7,650km² of acreage in Assam Arakan Basin. Credit: Cairn Oil & Gas.

ndia's oil and gas exploration and production company Cairn Oil & Gas <u>has started test production from the</u> <u>Hazarigaon field</u> in Assam, India.

The Hazarigaon field was awarded to Cairn, a unit of Vedanta, in a discovered small field (DSF)-II bid round.

The gas produced from the field is supplied through a main trunk pipeline and a gas cascading system to Assam Gas Company Limited (AGCL) as part of gas sales agreement (GSA).

As per the GSA, Cairn will sell 3.5 million cubic feet per day of gas from the Hazarigaon field to AGCL.

The field's gas will be used by industries including tea

aim to be self-reliant in oil and gas with government support, infrastructure and fast-tracked approvals.

In the next two years, Cairn is planning to drill five to ten high impact exploration wells across the Golaghat, Jorhat and Tinsukia districts of Assam.

The company currently owns 7,650km² of acreage in the Assam Arakan Basin.

As per estimates, the acreage holds resource potential of up to one billion barrels of oil equivalent.
